

Corporate Overview

Business Transformation

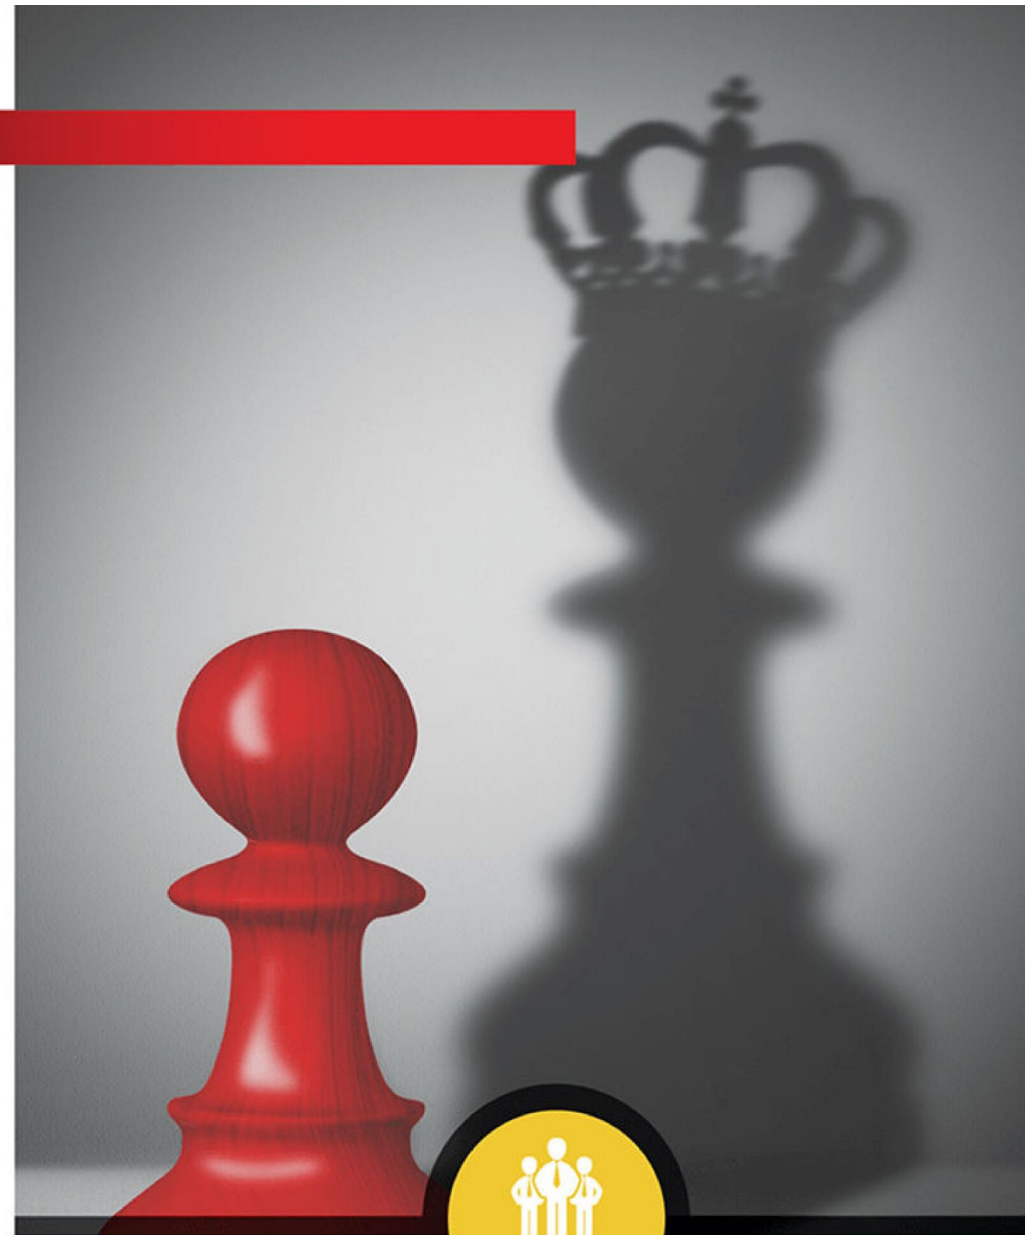

It's transform or wither in today's ever-shifting operating environment of business, with multiple transformation triggers creating strong pressure simultaneously.

We are living in interesting times, with multiple transformation triggers all present at the same time, all equally intense, additionally, as the life spans of these trends continue to shorten, organizations need to respond with flexible solutions they can adapt to the next development.

The idea behind the **transformation** is to identify and implement long-standing changes that move the company from its present situation to a level that is closer to what the company ultimately wants to be.

Business transformation is achieved through following stages

- Recognizing the need to change
- Agreeing what change should take place
- Understanding what the organization is changing from
- Designing the new organizational way of working
- Testing and implementing changes
- Bedding in the change

" bTranz helps the organizations to manage the "Business Transformation" as a "change management strategy", which aims to align People, Process and Technology initiatives of a company with its business strategy and vision "

Your **Business** does not get better by **Chance**
it gets better by **Change**

Oracle ERP Services:

- Strategic assessments.
- Oracle License audits
- Implementations and upgrades
- Custom development
- Database optimization
- DBA Services with RAC

Strategic Assessments, industry specific solutions to the most comprehensive cloud on the planet, Oracle delivers world class hardware and software solutions that work together in the cloud and in your data center.

Oracle VAT Compliance:

- **Tax automation:** You can continue to use your existing Oracle systems as normal, but you'll need to implement tax modules, which fall under Oracle's financial suite.
- **Reporting and provisioning:** You will need to deploy a cloud-based solution that enables you to carry out tax-reporting and provisioning processes.

The success of an organization's GCC VAT implementation will depend on its ability to prepare in advance and quickly deploy automated processes across the organization. The good news is that bTranz have good experience to help you along your journey – to not only become VAT-compliant but also to modernize your entire business with the most complete suite of Oracle Applications.

"The most critical feature of the VAT compliance is the **"Self-Assessment Nature"**, which implies that every business, which is VAT registered, must record, access and report its **VAT obligations and entitlements**, in accordance with the law to the regulatory authorities."

Application Development:

Over the years, **bTranz** providing well Customized Product and Application Development Services and Solutions to the businesses globally. From proposal request to continuous delivery.

At **bTranz**, we have developed an Adaptive Application Development Framework that covers the complete scope of the Software Development lifecycle to deliver the best of design, development and delivery practices.
