

E-Invoicing

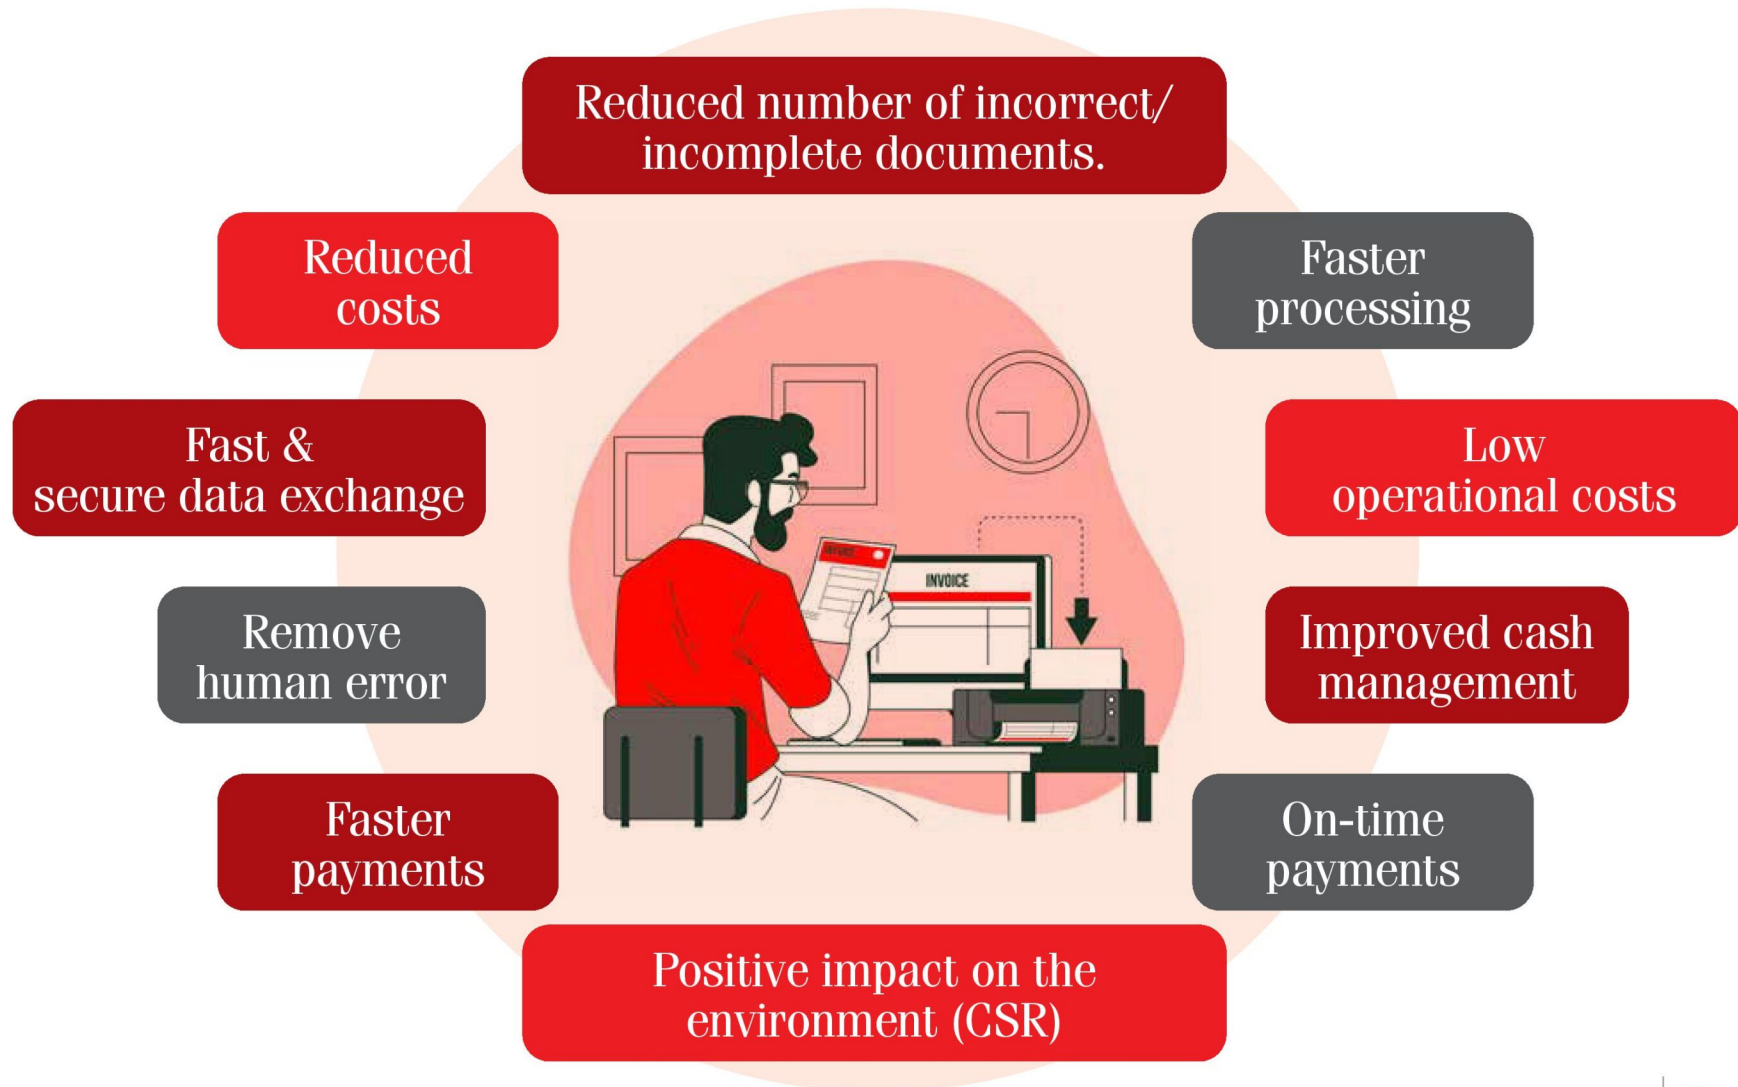

WHAT IS E-INVOICE?

Electronic Invoicing is a procedure that aims to convert the issuing of paper invoices as well as credit and debit notes into an electronic process that allows the exchange and processing of invoices, credit and debit notes in a structured electronic format between the buyer and seller.

According to the law, an electronic invoice (e-invoice) is an invoice generated and stored in a structured electronic system with all the tax invoice requirements. E-invoicing can help replace manual tasks with automated business rules and actions to increase efficiency, minimize error handling, and help businesses comply with e-invoicing legislation.

E-INVOICING BENEFITS

Who is Required to Invoice Electronically in Saudi Arabia?

- Third parties issuing invoices on behalf of taxpayers subject to VAT
- All resident, taxable persons in Saudi Arabia
- The new regulation applies to B2B transactions

Primary Requirements Of Technical E-Invoicing Solutions

- Mandatory to be accessible online.
- Mandatory to be allowed access by external systems through APIs.
- Must apply control mechanisms that guarantee the authenticity and integrity of the information.
- Must comply with security and cybersecurity requirements in the country.
- The use of invoices in PDF format, whether scanned or in any other format besides the structured file, will not be allowed once e-invoicing becomes mandatory.
