Products

- Oracle ERP
- Oracle Database
- OBIEE
- ADF
- Oracle APEX

Services

- Strategic Assessments
- Business Process Re-Engineering
- Implementation & Rollout Services
- Upgrade Services
- DBA Services
- Support Engagement

"You are surrounded by simple, obvious solutions that can dramatically increase your income, power, influence and success. The problem is, you just don't see them." –Jay Abraham
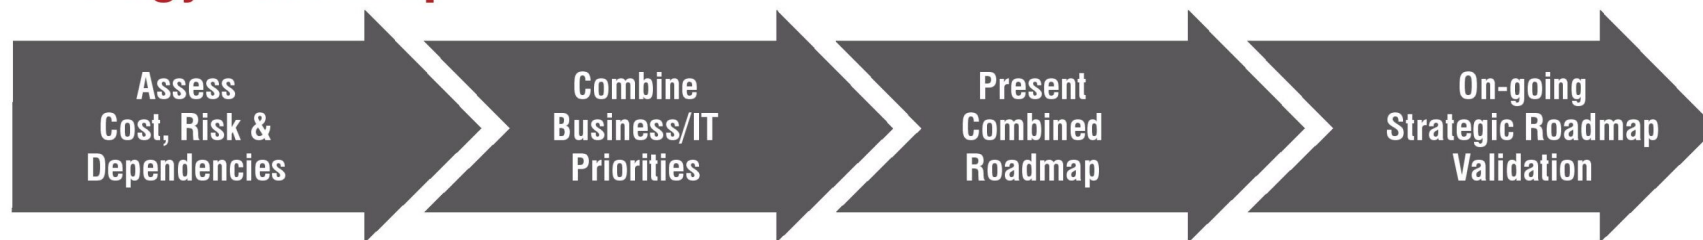

Strategic Assessments

An ERP assessment is a set of activities to determine how the organization is utilizing their ERP solution and identify opportunities for generating additional value from the investment.   It is also a chance for the customer's IT organization to develop an ERP roadmap to align with Business Objectives. Following is a brief overview of how to perform an ERP assessment.

- **Conduct a ERP software assessment**
- **Perform a Business Process assessment**
- **Conduct a People assessment**
- **Conduct a Helpdesk request assessment**

Health Check Assessment

Define Business Goals, Strategies, Needs	Inventory Current State Solution	Define Gaps, Duplication & Inefficiencies	Prioritize Business Needs

Strategy Road Map

| Assess Cost, Risk & Dependencies	Combine Business/IT Priorities	Present Combined Roadmap	On-going Strategic Roadmap Validation

Business Process Re-Engineering

Business Process Reengineering (BPR) helps companies to radically restructure their organization by focusing on the ground-up design of their business processes. Many ERP Implementations have gaps in "What is Implemented" and "What is being Practiced".

Proper execution of BPR can be a game-changer and create miracles on a failing or stagnating company by increasing the profits and driving the growth.

It involves enforcing change in an organization through optimization and elimination of redundancy and wastage in product/service. Typically, it involves the analysis of workflows, identification of inefficient processes to eliminate or improve them.

BPR is a continuous activity as new technologies and processes needs to be embedded in growing business and its challenges.

- Identifying Existing Business Processes
- Gather Key User Input from each Business Function
- Conduct Fitment Analysis
- Preparing "TO BE" Design
- Implementation and Testing

bTranz | ORACLE Gold Partner

ERP is certainly action as an impetus for the replacement for a mix of aging legacy system with a common platform. Mainly because mix of aging legacy systems had led to high cost support and the firms expected business benefits.

Identifying Team → Familiarization → Configuration → Business Process Modelling & CRP → Development & Unit Testing → Testing & User Training → Deployment

- **End to End Implementation**
- **Functional or Technical Implementation**
- **Database Implementation**
- **Testing the Business Processes**
- **Rollouts**
- **User Trainings or Consultant Trainings**

Upgrade Services

Upgrading to New Releases of Oracle Application once was a matter of choice. Nowadays, streamlining Finance, HR, and other back office processes has become a necessity for companies that need to stay ahead in the race for greater profits.

| Assessment | Test Cases and Process Mappings | Upgrade and Test | Process Improvement | Deployment |

- **Overall Program Management**
- **Database Upgrades and Administration**
- **Application Upgrade Services**
- **Custom Components – Assessment, Retrofit, and Redeployment**
- **Testing and Validation**
- **Training and User Adoption**
- **Post-Upgrade Support**

VAT Compliance

Step 1: Analysis of Existing System (Financials, Inventory and Reporting).

Step 2: Requirement Gathering, doing Gap Analysis and Documenting Process flows.

Step 3: Designing the New system, preparing Tests cases andtaking Signoffs.
